Welcome Message

It is my great pleasure and honor to invite you to attend the Second Gulf Cooperation Council (GCC) Organ Transplantation Congress this coming October 3 – 6, 2011 which will be held in Riyadh, Kingdom of Saudi Arabia.

The organizing Committee has made every effort to put together an attractive program, which will refresh your knowledge base and explore the innovations in the transplantation science and have an opportunity to meet the leading experts in the transplantation field.

The congress is designed for physicians, surgeons, scientists and organ procurement personnel, who are interested in the clinical and research aspects of transplantation with a cutting edge scientific program; pre-congress, post graduate educational courses, plenary sessions, state-of-the art symposia, and keynote lectures.

The GCC countries have established organ transplantation programs since the early 1980's. In addition, their cooperation through the GCC transplantation committee has been active since 1990's. Organ sharing is a reality among them and are growing steadily, and they have recently accomplished the directory for organ donation and transplantation in them. This prospective second congress for organ transplantation in the GCC countries will be another achievement of the cooperation and a step forward toward better future.

Riyadh, the capital city of Saudi Arabia is a wonderful and dynamic city; its modern innovations and natural beauty are well harmonized with historic and cultural heritage.

I hope you join us for the Second GCC congress in Riyadh during the beautiful season in October and enjoy the unique Saudi Culture.

I sincerely look forward to welcoming all of you to this congress.
